CARIBBEAN COMMUNITY AND COMMON MARKET

Biennial Report on the Operation of the Agreement

Communication from the Parties

The report below, dated 21 May 1999, presents the information received from the Permanent Mission of Jamaica, also on behalf of the other parties to the Caribbean Community and Common Market (CARICOM) who are Members of the WTO (Antigua and Barbuda, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, St Lucia, St Kitts and Nevis, St Vincent and the Grenadines, Suriname and Trinidad and Tobago) and is organized in accordance to the Standard Formats for Information on Regional Trade Agreements and on Economic Integration Agreements on Services (WT/REG/W/6 and WT/REG/W/14, respectively).

Overview

In keeping with the relevant provisions of Article XXIV of the General Agreement on Tariff and Trade (GATT), the report on the developments in the Caribbean Common Market is prepared for the consideration of the WTO Council for Trade in Goods and the Committee on Regional Trade Agreements.

The CARICOM Agreement was notified under GATT Article XXIV as an interim agreement for the formation of a Customs Union.¹ The Agreement was examined by a GATT Working Party and it was generally agreed that "the Caribbean Common Market constituted an Interim Agreement leading to the establishment of a Customs Union and as such was consistent with the Provisions of Article XXIV of the General Agreement".²

Since the submission of the last report to the GATT,³ there have been several major developments in the CARICOM, towards the objective of deeper regional economic integration and adherence to the disciplines of the multilateral trading system. CARICOM Member States have been promoting economic development and the expansion and diversification of trade in the region through closer integration and an extension of the scope of liberalization among each other. Closer internal integration and liberalization have been paralleled by a reduction in barriers to trade with third countries, an increase in economic and trade cooperation with neighbouring countries and an expansion of trade with other countries. Agreement has been reached on proposals to deepen the integration arrangement, strengthen economic relations with third countries, and participate in the process of liberalization which is rapidly advancing in the global economy. To this end, a number of trade liberalization measures such as lowering tariffs, elimination of quantitative restrictions (QRs)

¹ L/4083 of 14 October 1974.

² Paragraph 13 of the Report, adopted on 2 March 1977 (24S/68).

³ L/5671, of 4 September 1984.

and reduction in the scope of licensing arrangements have been adopted by the grouping and by individual CARICOM Member States.

Since the establishment of the Caribbean Free Trade Association (CARIFTA) in 1968, and the Caribbean Community and Common Market in 1973, the Member States of the CARICOM have made significant strides in consolidating the regional integration movement by strengthening and deepening the Customs Union arrangements. Much emphasis has been on the further harmonization of customs tariffs, the development of the common market origin rules and the improvement of the scheme for the harmonization of fiscal incentives.

In 1989, five years prior to the establishment of the WTO, CARICOM Member States agreed to advance beyond the Common Market towards more comprehensive economic integration, recognizing that while it had achieved significant liberalization of the market for goods, the further development of the regional economy required measures to encourage the movement of, and access to, the factors of production, the delivery of services and the establishment of business. In 1991, the main areas of emphasis in the creation of the Single Market and Economy were agreed. These included the completion of the arrangements of the free internal movement of goods of area origin; mechanisms for the free movement of services, capital and labour; and the greater harmonization of laws and regulations affecting commerce, including customs laws and procedures, intellectual property, competition policy, corporate taxation, dumping and subsidization.

Specifically, the policy to create the Single Market and Economy advocates:

- (a) The free movement of goods, services and factor of production, namely:
 - (i) free movement of goods and services;
 - (ii) free movement of capital;
 - (iii) free movement of labour; and
 - (iv) the freedom of CARICOM nationals to establish enterprises anywhere in the Community.
- (b) More comprehensive harmonization of laws affecting commerce and regulation of economic activities within the market area, including customs laws, intellectual property, competition, corporate taxation and commercial legislation in such areas as dumping and subsidization.
- (c) The reform of the institutions of the Community, including the administrative system and procedures, and the establishment and joint management of common services with particular reference to customs services and data and information services.
- (d) More intensive coordination of macro-economic policy and planning, external trade and economic relations.
- (e) Completion of the application of the Common External Tariff (CET). This was accompanied by a decision to simplify the structure and systematically reduce the level of the CET on a programmed basis to a maximum of 20 per cent on non-agricultural goods and 40 per cent on agricultural goods.

In order to effectively implement the Single Market and Economy, new arrangements have been put in place, new institutions have been created and new rules established for internal consultation, coordination and cooperation in macro-economic policy and planning, monitoring of economic policy convergence, development of a common currency, harmonization of fiscal and other incentives, double taxation, capital market integration and legislative and administrative practices.

In keeping with the process of global liberalization, the Community decided to reduce the level of the CET in a harmonized manner by adopting a strategy of scheduled cuts in four phases.

All of the independent countries of CARICOM, except The Bahamas, are Members of the WTO. Nine CARICOM Member States, as contracting parties to the GATT 1947, participated in the Uruguay Round of Multilateral Trade Negotiations. All made binding offers in goods and services and signed the Marrakesh Agreement in 1994, which became effective with the establishment of the WTO on 1 January 1995.

I. BACKGROUND INFORMATION ON THE AGREEMENT

The 1973 Treaty Establishing the Caribbean Community was intended primarily to achieve three broad objectives, namely:

- (a) The economic integration of the Member States by the establishment of a Common Market Regime;
- (b) the coordination of the foreign policies of Member States; and
- (c) functional cooperation.

The Annex to the Treaty Establishing the Caribbean Community contains instruments for the establishment and operation jointly by the Contracting Parties of a Caribbean Common Market, which was established with its own international juridical personality. The Common Market has three objectives, namely:

- (a) To strengthen coordination and regulation of the economic and trade relations among members;
- (b) sustained expansion and continuing integration of the economies of members; and
- (c) achievement of a greater measure of independence and effectiveness in dealing with states, groups of states and entities of whatever description.

1. Membership and Dates of Signature, Ratification and Entry into Force

The membership of the Caribbean Community now stands at 14 States and Territories, 13 of which are independent and one, Montserrat, is an Overseas Territory of the United Kingdom. Thirteen are full members of the Common Market.² In January 1996, Suriname became the fourteenth Member State when that State acceded to the Treaty. Haiti will be the fifteenth State, since its application for full membership has been accepted by the Conference of Heads of Government of the Caribbean Community (the Conference), and the Terms and Conditions of Accession are currently under negotiation. Two territories, the British Virgin Islands and the Turks and Caicos Islands, are associate Members of the Caribbean Community, which is in the process of negotiating similar membership with Anguilla.

² The Bahamas is an associate but not a full member of the Common Market.

Article 24 of the Treaty provided that the Agreement enter into force on 1 August 1973 if the instruments of ratification were deposited in accordance with Article 23 by Barbados, Guyana, Jamaica and Trinidad and Tobago; if not, then entry into force would occur on such later date on which the fourth such instrument had been deposited. The condition was met and the Treaty thus entered into force on 1 August 1973.

Table 1 - Dates of Entry into Force of the Treaty

State	Date Signed	Ratification Deposited	Effective Date
Antigua and Barbuda	4.7.74	4.7.74	4.7.74
The Bahamas	4.7.83	4.7.83	4.7.83
Barbados	4.7.73	30.7.73	1.8.73
Belize	17.4.74	17.4.74	1.5.74
Dominica	17.4.74	17.4.74	1.5.74
Grenada	17.4.74	17.4.74	1.5.74
Guyana	4.7.73	28.7.73	1.8.73
Jamaica	17.4.73	31.7.73	1.8.73
Montserrat	17.4.74	17.4.74	1.5.74
St. Kitts-Nevis-Anguilla	26.7.74	26.7.74	26.7.74
St. Lucia	17.4.74	29.4.74	1.5.74
St. Vincent & the Grenadines	17.4.74	23.4.74	1.5.74
Suriname	did not sign	4.7.95	4.7.95
Trinidad & Tobago	4.7.73	30.7.73	1.8.73

The membership of the CARICOM Common Market is comprised of the States and Territories which make up the Caribbean Community. Only one country, The Bahamas, which is a member of the Caribbean Community, is not a member of the Common Market.

4. Trade Data

Trade in goods

CARICOM's total imports increased in nominal terms from US\$5.257 billion in 1990 to US\$9.036 billion in 1997, or 72 per cent. This represented an annual growth of 8 per cent. Intra-CARICOM imports, which varied between 8.4 and 10.5 per cent of total imports over the 1990-7 period, grew from US\$0.5 billion to US\$0.853 billion. This represented a period growth of 71 per cent and of 7.9 per cent per annum. Total imports thus grew marginally faster than intra-regional imports over the period. Given the relative magnitude of total and intra-regional imports and the relative growth rates, it is clear that the CARICOM trade arrangements have not diverted import trade (see Table 2).

Viewed from the perspective of exports, CARICOM's total domestic exports increased in nominal terms from US\$3.871 billion in 1990 to US\$5.0396 billion in 1997 or by 30 per cent. This represented an annual growth of 3.8 per cent over the period. Intra-CARICOM domestic exports varied between 11.9 and 17.1 per cent of total domestic exports in the 1990-97 period. In normal terms, intra-regional domestic exports increased from US\$0.475 billion in 1990 to US\$0.857 billion in 1997 or by 80 per cent. This represented an annual rate of increase of 8.8 per cent over the period. Domestic exports to extra-CARICOM destinations increased from US\$3.396 billion in 1990 to US\$4.182 billion in 1997 or by 3 per cent. The annual growth was 23 per cent (see Table 3).

The rate of growth of domestic exports to extra-CARICOM destinations was markedly lower than intra-CARICOM domestic exports. The commodity composition of intra-CARICOM exports and exports to extra-regional destination is significantly concentrated. Intra-CARICOM exports are dominated by petroleum and petroleum products and non-traditional manufactures, while extra-regional domestic exports are dominated by petroleum and petroleum products, traditional agricultural commodities (sugar, bananas and rice), minerals (bauxite and alumina, and gold). The change in trade performance is therefore not a result of the diversion of export products to the regional market, but of a tightening of external markets.

Detailed trade statistics can be found in the Annex.

Table 2 – Total and Intra-CARICOM Imports, 1990-1997
(US\$ 000)

	1990	1991	1992	1993	1994	1995	1996	1997	% Average growth ⁴ (90-97)

Trade in services

The services sector share of Gross Domestic Product (GDP) for CARICOM countries in 1996-1997 averaged 73 per cent, ranging from Antigua and Barbuda with 88 per cent to Guyana at 28 per cent.

Table 4 - Services Sector Share of GDP for CARICOM Countries at Current Market Prices, 1996-1997

CARICOM Countries	Share %	
	1996	1997
Antigua and Barbuda	88.2	87.9
The Bahamas	n.a.	n.a.
Barbados	82.6	83.1
Belize	62.8	64.4
Dominica	70.6	71.2
Grenada	81.7	82.5

St. Vincent and the Grenadines	74.7	75.9
Suriname	n.a.	n.a.
Trinidad & Tobago	56.4	55.8
Average for 12 CARICOM Countries	72.7	73.3

Source: Statistics section, CARICOM Secretariat, National Accounts Database

Statistics on the regional cross border trade in services, as measured by the balance-of-payments data, are highly aggregated. It is difficult at this time to differentiate and compare Member States' trade with the rest of the world and trade with other CARICOM countries. Data from 1986 to 1995 suggest that the region had a positive net services balance averaging US\$59.6 million. This ranged from US\$10.9 million in 1986 to US\$102.5 million in 1995. Guyana recorded a persistent negative net service balance which averaged US\$111.8 million per year. Trinidad and Tobago and Dominica recorded negative services balances during the late 1980's but these changed to positive balances during 1990-1995.⁵

II. TRADE PROVISIONS⁶

Provisions Affecting Trade in Goods

The vigorous effort at implementing the trade provision and policies of the Common Market Annex, particularly in the period since the 1989, and the 1991 decisions towards the Single Market and Economy have in effect completed the creation of a free-trade area of goods of common market origin. The regime provides for all goods of common market origin, except in a limited number of clearly identified circumstances, to be free of customs duties, tariff quotas and charges having equivalent effect to customs and fiscal duties, and of any QRs and measures having equivalent effect to QRs, except where domestic production is similarly treated. Member States are committed to maintaining liberalized trade in goods among the participating States. Compliance is monitored by the Council for Trade and Economic Development (COTED), which reports to the Conference on cases of persistent violation.

The Conference, at its Seventeenth Meeting in July 1996, instructed that all residual tariff or non-tariff barriers to intra-regional trade on goods which were not in accordance with the Treaty be eliminated by 31 December 1996. A review in January 1999 revealed that there were only three Member States which had unauthorized non-tariff barriers, that is, licensing requirements on four Common Market products (namely, aerated beverages, fresh milk, malt stout and toilet paper). The COTED is monitoring the removal of these licenses.

1. Import Restrictions

- 1.1 Duties and charges &
- 1.2 Quantitative restrictions

Article 15 of the Common Market Annex prohibits the application by a Member State of import duties, or any charges having an effect equivalent to an import duty, on goods which are of Common Market origin. Article 21 on Quantitative Import Restrictions prohibits the application of QRs by a Member State on goods of Common Market origin.

There are some exceptions for special circumstances, mainly relating to health and security, safeguard, revenue and the facilitation of development in the less-developed countries (LDCs). These special circumstances are embodied in different Articles, namely Article 13 (Exclusion from this Annex) and Schedule I (Products excluded from the Annex to the Treaty in pursuance of contractual obligations of Member States); paragraph 5 of Schedule III (Reserve list applying to the less developed countries); Article 19 (Dumped and Subsidized Imports); Article 23 (General Exceptions); Article 24 (Security Exceptions); Article 28 (Import Restrictions arising from Balance-of-Payment

⁵ Regional Services Sector Development Programme – CARICOM Secretariat, 1998.

⁶ Trade provisions are those of the CARICOM Agreement.

Difficulties); Article 29 (Difficulties in Particular Industries); Article 56 (Promotion of Industrial Development in the Less Developed Countries);⁷ and Schedule IX (Marketing of oils and fats products).⁸

Since the conclusion of the Treaty, there have been significant efforts to eliminate, wherever possible, the exceptions:

- (a) The items under Schedule I have been greatly reduced. This Schedule now contains only 9 products.
- (b) The list of products under paragraph 5 of Schedule III has also been reduced. The remaining facility relates to the suspension of Common Market tariff treatment by some of the LDCs on rum, cigarettes and motor vehicles for a period of three years from 1998. Three LDCs (Belize, Dominica and Grenada) continue to apply import duty on these items when imported from the more developed countries (MDCs) of the Common Market.
- (c) The operation of the Protocol contained in Schedule IX has been simplified and the private sector integrally involved to ensure that the element of protection is only to ensure the objective of facilitating the trade from the LDCs.
- (d) Nine product groups currently benefit from Article 56 treatment: curry powder, pasta products, candles, industrial gases, wheat flour, aerated beverages, beer, solar water heaters, and furniture of wood and upholstered fabric. The agreement is for the application of Article 56 treatment on these products to the year 2004.

1.3 Common External Tariff

The 1973 Treaty (Articles 31 and 32 of the Annex) provided for a Common Protective Policy which would incorporate the establishment and operation of a CET, the progressive elimination of national QRs on goods from third countries and their replacement by regional QRs, where appropriate. Under the plan and schedule, the CET was to be achieved in 1983. Economic difficulties emanating from the oil crises and the resultant international economic recessions of 1973/74 and 1979/80 made the achievement of this target impossible. Further, the Conference decided in the Nassau Declaration of 1984 to jettison the use of regional QRs for affording protection against third-country goods and to encourage Member States to phase out the use of national QRs. The CET has thus become the regional instrument affecting the importation of goods from third countries.

The objective of an agreed common structure and level for the CET was achieved in 1991. There was a simultaneous decision, however, to gradually reduce its level thereby reducing its protective content. A schedule for the phased reduction of the CET was established in 1992; it provided for the reduction of the rates over a period of five years, with effect from January 1993 and to be completed by 30 June 1998. The maximum applied rates of tariff would be 40 per cent for

⁷ Article 56 provides for the promotion of industrial development in the LDCs of the Common Market through the application of licensing or import duty on imports of specified products from the more developed countries.

⁸ Schedule IX permits the application of import licences on oils and fats products, including soaps, to ensure a market for those products from the LDCs.

primary agricultural products and 20 per cent for all other products.⁹ All CARICOM Member States have committed to and are required to apply both the structure and the agreed rates of the CET.

A rate structure of 0, 5, 10, 15 and 20 per cent was to be achieved at the end of the period 1.1.93 to 1.1.98, by the way of a phased reduction of the rate of the CET. One Member State (Belize) was granted a derogation to implement the rate structure two years after the commencement of each implementation period. The CET rate structure is phased in as follows:

Phase	Period of application	Implementation period	Rate structure
Phase I	1.1.93 to 31.12.94	1.1.93 to 30.6.93	0-5% to 30/30%
Phase II	1.1.95 to 31.12.96	1.1.95 to 30.6.95	0-5% to 25/30%
Phase III	1.1.97 to 31.12.97	1.1.97 to 30.6.97	0-5% to 20/25%
Phase IV	1.1.98 onwards	1.1.98 to 30.6.98	0-5% to 20%

There has been some slippage in the reduction timetable. 1999 remains the target year with the current status of implementation by Member States as follows:

Phase	Implementation by	Percentage of extra-regional import trade ¹⁰
Phase IV	Barbados, Jamaica, St. Vincent and the Grenadines, Trinidad & Tobago	83.0
Phase III	Belize, Dominica, Grenada, Guyana, Suriname	12.4
Phase II	St. Kitts and Nevis, St Lucia	4.6
Phase I	Antigua and Barbuda	n.a.

2. Export Restrictions

Article 22 of the Annex to the CARICOM Treaty prohibits the application of QRs on exports by Member States to any other Member State of the Common Market, except where otherwise provided in the Annex. Articles 23 and 24 provide the possibility of quantitative export restrictions being applied under special circumstances. Neither of these provisions has ever been invoked.

3. Rules of Origin

Specific rules of origin are maintained to distinguish between goods which qualify for preferential treatment in the Common Market and goods produced or imported from non-CARICOM countries, which do not qualify for such treatment.

The CARICOM Rules of Origin, based on the Harmonized Commodity Description and Coding System 1996, are detailed in Article 14 of the Annex to the 1973 Treaty. Goods are treated as being of Common Market origin if they have been wholly produced within the Common Market, or if they have been produced within the Common Market wholly or partly from materials imported from third countries, provided substantial transformation has taken place within the Common Market.

Substantial transformation may be achieved by the goods being classified under a different tariff heading from the materials utilized, or by the achievement of a prescribed level of local or regional value added. Goods may be treated as being of Common Market origin in accordance with the specific criteria defined specifically for each tariff heading in Part A of the List in Schedule II of

⁹ This was a unilateral decision taken by the Community and not compensated in the Uruguay Round.

¹⁰ Computation based on 1997 data, excluding Antigua and Barbuda and Guyana.

Article 14 of the CARICOM Treaty. For Common Market origin treatment based on value-added, a good should have at least 65 per cent local or regional value added; i.e. incorporated inputs from third countries should not exceed 35 per cent.

4. Standards

The issue of standardization is dealt with in Article 42 of the Annex to the Treaty (Harmonization of Laws) in respect to industrial standards and sanitary and phytosanitary (SPS) arrangements pertaining to agricultural products. There have been efforts to harmonize standards across Member States.

The Caribbean Common Market Standards Council (CCMSC) was created as a specific institution charged with responsibility for advising the COTED on standards matters. The CCMSC was established in 1976 with the objective of promoting the progressive development and harmonization of standards, as well as of standards institutions throughout the region.

The development of harmonized regional standards is based on the importance of the issue of intra-regional trade, consumer health and safety, and environment protection. CARICOM standards are usually adopted or adapted from international standards such as ISO, IEC, Codex and those of the region's major trading partners. Since 1976, over 100 standards have been drafted under the auspices of the CCMSC and circulated to Member States for comment. To date, 44 standards have been declared as CARICOM standards.

SPS measures are provided for under Articles 21 and 22 of the Annex to the Treaty (Quantitative Import Restrictions and Quantitative Export Restrictions, respectively), and are applied to protect animal or plant life or health, as well as with respect to food safety.

5. Safeguards

There are provisions for Member States to seek relief from obligations where difficulties arise in respect of particular industries, including agriculture, or to secure the stability of the balance-of-payments (BOP).

Balance-of-payments

Article 28 provides for the temporary imposition by a Member State of restrictions on Common Market origin imports for the purpose of safeguarding its BOP. The restrictions may not be imposed for longer than eighteen months without the review and approval of the COTED. No Member State has resorted to the provision in this Article since 1980.

Special industry

Article 29 allows a Member State, in the event of serious threat to an industry or particular sector of an industry, due to a substantial decrease in internal demand for a domestic product as a result of an increase in imports consigned from other Member States, to take action to limit such inflows.

Article 29A is a parallel provision to Article 29 in respect of Primary Agricultural Products. This Article was not in the original Treaty, which was amended in 1995 to make it clear that the provisions of Article 29 apply *mutatis mutandis* to primary agricultural products as they apply to an industry or a particular sector or an industry.

Revenue

Paragraph 5 of Schedule III provides the possibility of safeguards measures where a less developed country has suffered, or is likely to suffer, loss of revenue as a result of the conditions regarding eligibility of goods for Common Market tariff treatment under Article 14 of the Annex to the Treaty.

6. Anti-dumping and Countervailing Measures & 7. Subsidies and State-aid

The internal regime prohibits dumping and subsidization and restrictive business practices.

Provisions Affecting Trade in Services

The CARICOM Treaty did not contain significant cooperative policies or mechanisms to give CARICOM services providers any preferred market access or even national treatment when they cross national borders. There have been cross national border activities, but these were not specifically provided for in the Treaty.⁷

The decision to create a Single Market and Economy is leading to developments which will significantly impact on services sector development and cooperation. These include:

- (a) The 1993 arrangement which offers the facility for companies in any Member State to list on any stock exchange in the region on the condition as national companies;
- (b) the negotiation of a Protocol (Protocol II) on establishment, services and capital;
- (c) the process of negotiations to amend the 1973 Treaty by replacing, in whole or in part, Articles 28, 35, 36, 37 and 43 of its Annex. These amendments will provide for the right of establishment, the right to provide services and the right to move capital by any national in the Community;
- (d) a 1995 Policy decision to provide, on a phased basis, for the free movement of skilled persons on the basis of mutual recognition or agreement on equivalency of educational qualifications; and
- (e) a multilateral agreement concerning the operation of air services within the Caribbean Community of the CARICOM Multilateral Air Services Agreement.

These developments and the negotiations in process will significantly modify the environment for service sector activity.

⁷ For example, commercial banks from other jurisdictions account for the following share of the total banking system: Guyana (29 per cent), Antigua and Barbuda (11 per cent), Grenada (40 per cent), St. Kitts and Nevis (17 per cent), St. Lucia (14 per cent) and St. Vincent and the Grenadines (20 per cent). Source: *Competitiveness of Caribbean Financial Services and WTO Related Negotiating Strategies*, M. Odle et al, CARICOM Secretariat/Regional Negotiating Machinery, 1998.

III. GENERAL PROVISIONS OF THE AGREEMENT

2. Accession

The Treaty is open to accession by other Caribbean countries (Article 29). In this regard, The Bahamas joined the Community (though not the Common Market) in 1983, Suriname in 1995 and final negotiations for Haiti's accession are advanced. The Community has also negotiated trade arrangements with neighbouring Colombia and Venezuela and is negotiating a reciprocal broad-based Free Trade Agreement with the Dominican Republic.

4. Relation with Other Trade Agreements

The Community has the capacity to negotiate cooperation agreements with other countries. The Community has negotiated trade arrangements with neighbouring Colombia and Venezuela and is negotiating a reciprocal broad-based Free-Trade Agreement with the Dominican Republic.

CARICOM/Venezuela

The CARICOM-Venezuela Trade and Investment Agreement was signed in October 1992 and became effective on 1 January 1993. This one-way preferential agreement was concluded under the facility for non-reciprocal partial scope agreement available to members of the Latin American Integration Association (LAIA). It is aimed at encouraging CARICOM exports to Venezuela on the basis of duty-free or duty-reduced access for identified products. CARICOM exports not included in the identified list of products enter Venezuela under Most Favoured Nation (MFN) provisions.

The Agreement contains safeguard provisions which may be applied by Venezuela in case of injury to domestic production or BOP difficulty and to prevent unfair trade practices. It also targets the promotion of investment, especially through the creation of joint venture arrangement between firms. There are no specific facilities for this however.

CARICOM/Colombia

The CARICOM/Colombia Agreement on Trade, Economic and Technical Cooperation was signed on 24 July 1994 and became effective 1 January 1995. The Agreement was also concluded under the facility for partial scope agreements available to members of the LAIA. The Agreement is an asymmetrical reciprocal arrangement, under which CARICOM was granted unilateral preferential access to its exports into the Colombian market for a period of four years. At the end of this period, the arrangement becomes reciprocal in relation to the four CARICOM MDCs, namely Barbados, Guyana, Jamaica and Trinidad and Tobago. A revision to this Agreement, effective 1 June 1999, provides that these four CARICOM Members grant duty-free or duty-reduced treatment to identified products from Colombia, while Colombia provides similar treatment to a different set of identified product from CARICOM Member States. MFN treatment applies with respect to other products.

The Agreement also provides for the phasing out of any non-tariff barriers and includes provisions for safeguard measures in the event of BOP problems or of injury or threat to domestic production, as well as for the application of anti-dumping and countervailing measures.

CARICOM/Dominican Republic

CARICOM and the Dominican Republic are in the process of negotiating a reciprocal trade agreement. A framework for the Agreement establishing the Free Trade Agreement (FTA) between the Caribbean Community and the Dominican Republic was signed on 22 August 1998. The

Agreement provides for the immediate elimination of duties or the phasing out of duties on all goods except for products which might be identified as sensitive. It also covers services, investment and government procurement. A Plan of Action attached to the Framework Agreement outlines the activities to be undertaken to conclude the detailed negotiations.

Free-Trade Area of the Americas (FTAA)

CARICOM Member States, along with all other independent countries of the Western Hemisphere (except Cuba), are in the process of negotiating a FTAA. The final structure of this Agreement will need to respond to important challenges, given the vast differences in size, levels of development and development potentials of the States involved in the enterprise.

5. Institutional Framework

The 1973 Treaty provides for the creation of two distinct entities, the Caribbean Community and the Caribbean Common Market. The Treaty was amended in 1997 with the signature of Protocol I, which restructures the Organs and Institutions of the Community.

The principal organs of the Community are:

- The Conference of Heads of Government:¹¹

The Conference is the Supreme Organ of the Community. It consists of the Heads of Government of the Member States and is the final authority of the Community.

The primary responsibility of the Conference is to determine and to provide the policy direction for the Community. The Conference is the final authority for the conclusion of Treaties on behalf of the Community and for entering into relationships between the Community and International Organizations and States.¹² It is also responsible for making the financial arrangements to meet the expenses of the Community but has delegated this function to the Community Council.

Decisions of the Conference are generally taken unanimously.

- The Community Council of Ministers (the Council):

The Council is the second highest organ. It consists of ministers responsible for community affairs and any other minister designated by Member States in their absolute discretion.

¹¹ A Bureau of the Conference came into operation in December 1992, following the adoption of a decision at the Special Meeting of Heads of Government in October 1992. The responsibility of the Bureau is to initiate proposals; update consensus; mobilize and secure implementation of CARICOM decisions in an expeditious and informed manner. The Bureau consists of the Chairman of the Conference, as Chairman, as well as the incoming and outgoing Chairmen of the Conference and the Secretary-General in the capacity of the Chief Executive Officer.

¹² The Prime Ministerial Sub-Committee on External Negotiations was established by the Conference of Heads of Government to ensure a common, coherent and coordinated external economic negotiations profile for the CARICOM Community, on behalf of the Community; and to facilitate the orderly coordinated and managed integration of the Community into the international economy.

The Council is responsible for the development of Community strategic planning and coordination in the areas of economic, integration, social and functional cooperation and external relations.

The principal organs of the Community are assisted in the performance of their functions by the following four Ministers Councils:

- (a) The Council for Trade and Economic Development (COTED), which manages the internal and external trade regime, the policies relating to movements of factors and the sectoral programmes of cooperation.¹³ The COTED promotes trade and economic development of the Community and oversees the operations of the CARICOM Single Market and Economy;
- (b) The Council for Foreign and Community Relations (COFCOR) determines relations with international organizations and third States;
- (c) The Council for Human and Social Development (COHSOD) promoted human and social development; and
- (d) The Council for Finance and Planning (COFAP) coordinates economic policy and financial and monetary integration of Member States.

The Caribbean Community has a number of Institutions, namely:

- Caribbean Disaster Emergency Response Agency (CDERA);
- Caribbean Meteorological Institute (CMI);
- Caribbean Meteorological Organization (CMO);
- Caribbean Food Cooperation (CFC);
- Caribbean Environment Health Institute (CEHI);
- Caribbean Agriculture Research and Development Institute (CARDI);
- Caribbean Regional Centre for the Education and Training of Animal Health and Veterinary Public Health Assistants (REPAHA);
- Association of Caribbean Community Parliamentarians (ACCP);
- Caribbean Centre for Development Administration (CARICAD); and
- Caribbean Food and Nutrition Institute (CFNI).

The following are Associate Institutions of the Community:

- Caribbean Development Bank (CDB);
- University of Guyana (UG);
- University of the West Indies (UWI); and
- Caribbean Law Institute/Caribbean Law Institute Centre (CLI/CLIC).

The Treaty establishes the Caribbean Community Secretariat as the principal administrative organ of the Community. Its functions are:

- (a) To service meetings of the Organs and Bodies of the Community and take appropriate follow up action on determinations issuing from such meetings;

¹³ The COTED is now responsible for trade and economic development issues, which were previously dealt with by the Common Market Council, and which has been replaced by the Community Council.

- (b) to initiate, organize and conduct studies on issues for the achievement of the objectives of the Community;
- (c) to provide, on request, services to Member States of the Community on matters relating to the achievement of its objectives;
- (d) to collect, store and disseminate to Member States of the Community information relevant for the achievement of its objectives;
- (e) to assist Community Organs in the development and implementation of proposals and programmes for the achievement of objectives of the Community;
- (f) to co-ordinate in relation to the Community the activities of donor agencies, international, regional and national institutions for the achievement of objectives of the Community;
- (g) to prepare the draft budget of the Community for examination by the Budget Committee;
- (h) to provide, on request, technical assistance to national authorities to facilitate implementation of Community decisions;
- (i) to conduct, as mandated, fact-finding assignments in Member States; and
- (j) to initiate or develop proposals for consideration and decision by competent Organs in order to achieve Community objectives.

IV. OTHER

In addition to the trade regime, the Common Market provides for internal consultation, coordination and cooperation among Members in the areas of macro-economic policy and planning, harmonization of fiscal incentives, double taxation, legislation and administration practices (in such areas as companies, trade marks, patents, design and copy rights, industrial standards, marks of origin, labelling of food and drugs, restrictive business practices, dumping and subsidization, plant and animal health), monetary payments and exchange rate policies; joint development of natural resources and marketing of agricultural products.

A special regime for LDCs is also integral to the Common Market Arrangement. The main purpose of the special regime is to provide support to the smaller and lesser developed Members of the Common Market and phase in the impact of the competition from the MDCs, in order to minimise the economic dislocation and create conditions in which, over time, they would be able to fully discharge the obligations assumed under the Annex to the Treaty. The main areas of authorized derogation from the requirements for full free-trade area treatment to give effect to this objective included: the right to apply duty and or QRs on identified products for a specific period (Article 56); the right to maintain duty on a limited number of goods for revenue purposes (Schedule III); a longer period to phase in the CET; and less rigorous origin requirements.

Conclusion

This Report is submitted in the context of a major effort to restructure, deepen and broaden the Customs Union arrangement envisaged in the 1973 Treaty of Chaguramas into a Single Market

and Economy. Negotiations for the substantive revision of the Treaty are not yet complete, however and hence, a revised Treaty is not now being submitted. This will, in all probability, be the last report submitted in the framework of the original 1973 Treaty.

The process of creating an internal Free-Trade Area for trade in goods is essentially complete. Significantly, less than one per cent of intra-regional trade (four products) are affected by unauthorized non-tariff measures maintained by four states. Trade in a limited number of other products from the MDCs are constrained as a matter of community policy, to provide some developmental advantage to the LDCs.

The original timetable and plan for the establishment of the CET (1983) was not met; the CET was established in 1992. A policy decision was taken to systematically reduce its rates to a maximum of 20 per cent on manufactured goods and 40 per cent on agricultural goods. These rates are well within the rates bound by the individual member countries in the Marrakesh Agreement.

Four Member countries, representing over 80 per cent of the import trade of the Common Market, have brought the CET to the agreed limits. The majority, if not all Member States, should complete the process by the end of the 1999 so that there should be a single tariff at the new reduced level in 2000.

The Community has jettisoned the use of QRs as a protective policy device. Individual Member States have also adopted this policy. There are no CARICOM-wide sanctioned QRs except in relation to oils and fats products and a small number of other products, specially to provide some developmental advantage to the LDCs.

The trade performance in the period since 1990 shows imports from the rest of the world growing at an even faster rate than intra-CARICOM imports. The intra-regional cooperation did not result in trade diversion from the rest of the world.

The Community has been structuring and strengthening the institutional capacity for discharging its internal and external responsibility to facilitate trade. All independent Common Market Member States are WTO Members. The Community has been assisting Member States, especially the small States, in their efforts to comply with WTO commitments.
