4. Sources

The principal source of the statistics is the UNSD Comtrade database. However, with a view to providing as much up to date information as possible some data on total trade in textiles and clothing have been estimated by the Secretariat on the basis of national returns and trading partner statistics. The tables on world trade (Tables 1 and 11) are derived from the Secretariat's world trade network.

Data for the European Union exclude intra-trade. The aggregate has been derived from the addition of individual member states' data which are not strictly comparable with regard to definitions of trade (special or general), and of countries of origin (provenance) and destination.

Symbols and abbreviations

- ... not available
- not applicable
- 0 figure is zero or became zero due to rounding
- I break in comparability of data series. Data after the symbol do not form a consistent series with those from earlier years.
- c.i.f. cost, insurance and freight
- f.o.b. free on board
- n.e.s. not elsewhere specified
