This definition is taken from the Secretariat paper on the Uruguay Round and developing economies (document MTN.TNC/W/122, MTN.GNG/W/30 of 29 November 1993).

Economies in Transition: Central and Eastern Europe, the Baltic States and the Commonwealth of Independent States.

C. WTO MEMBERS: THE MEMBERSHIP IS AS AT 26 JULY 2001

IV. SOURCES

The principal source of the statistics is the UNSD Comtrade database. However, with a view to providing as much up to date information as possible some data on total trade in textiles and clothing and regional integration arrangements have been estimated by the Secretariat on the basis of national returns and trading partner statistics. The tables on world trade (Tables 1 and 12) are derived from the Secretariat's world trade network.

Data for the European Union exclude intra-trade. The aggregate has been derived from the addition of individual member states' data which are not strictly comparable with regard to definitions of trade (special or general), and of countries of origin (provenance) and destination.

Beginning with 2000, data for the member states of the South African Customs Union are reported separately.
